

CRA Public File

Main Office – Muscle Shoals

March 10, 2025

Community Reinvestment Act – Public File

Main Office - Public File Requirements

- I. All written comments received from the public for the current year and each of the prior two calendar years that specifically relate to the bank's performance in helping to meet community credit needs, and any response by the bank. If neither the comments nor the responses contain statements that reflect adversely on the good name or reputation of any person other than the bank or publication of which would violate specific provisions of law.
- II. The institution's most recent CRA Performance Evaluation,
- III. A map of each facility-based assessment area showing its boundaries and, on the map or in a separate list, the census tracts contained within the facility-based assessment area,
- IV. A list of the institution's branches, their street addresses, and census tracts; a list of branches opened and closed during the current year and each of the prior two calendar years.
- V. A list of retail banking services (including hours of operations, available loan and deposit products and transaction fees) generally offered at the bank's branches and descriptions of material differences in the availability or cost of services at particular branches, if any,
- VI. The institution's loan-to-deposit ratio for each quarter of the prior calendar year,
- VII. A quarterly report of the institution's efforts to improve its record if it received a less than satisfactory rating during its most recent CRA examination, and
- VIII. HMDA disclosure Statements for the prior two calendar years for the institution and for each non-depository affiliate the institution has elected to include in assessment of its CRA record, if applicable.

The CRA Public file is available at the Bank's public website <https://www.firstmetro.com>. You may also ask us to provide you with a copy, either in paper or digital form, of our CRA Public File for you to read at your convenience. We are allowed to charge you a reasonable fee to cover the cost of copying and mailing.

I. Written CRA-Related Comments

- I. All written comments received from the public for the current year and each of the prior two calendar years that specifically relate to the bank's performance in helping to meet community credit needs, and any response by the bank. If neither the comments nor the responses contain statements that reflect adversely on the good name or reputation of any person other than the bank or publication of which would violate specific provisions of law.

First Metro Bank has not received any comments from the public regarding its performance in meeting community credit needs for the current year and the preceding two calendar years.

II. Public Section of CRA Performance Evaluation

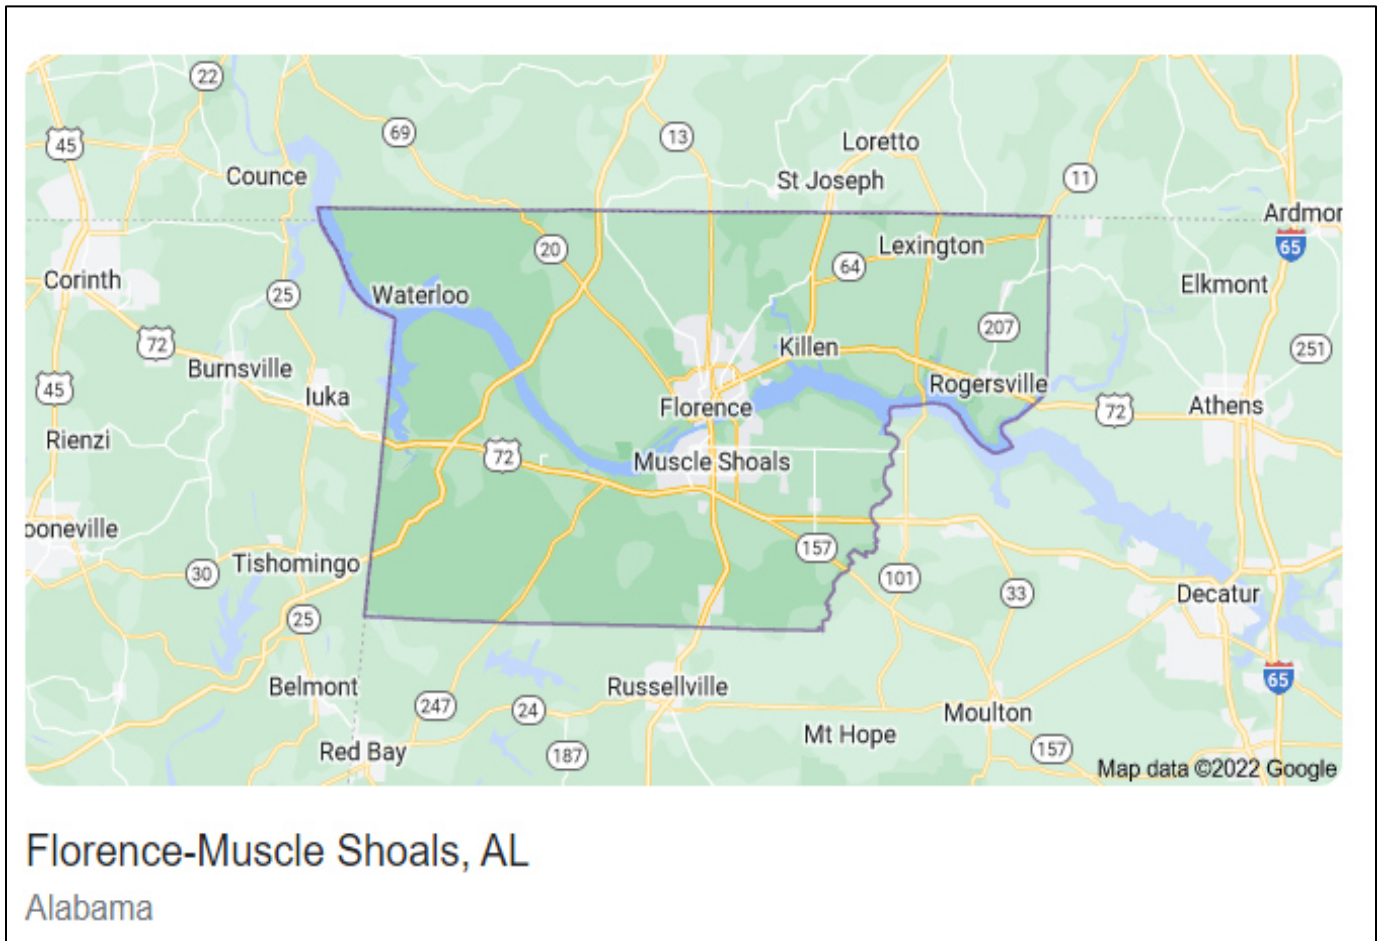

- II. A copy of the public section of the institution's most recent CRA Performance Evaluation prepared by the FDIC. The institution shall place this copy in the public file within 30 business days after its receipt from the FDIC.

The public section of the bank's most recent CRA Performance Evaluation prepared by the FDIC is located as the final document of this public file.

III. Facility-Based Assessment Area Maps & Census Tracts

- III. A map of each facility-based assessment area showing its boundaries and, on the map or in a separate list, the census tracts contained within the assessment area.

IV. Branch Listing

- IV. A list of the institution's branches, their street addresses, and census tracts; a list of branches opened and closed during the current year and each of the prior two calendar years.

First Metro Bank has eleven full-service facilities and six limited-service, non-traditional high school branches, all within our three defined facility-based assessment areas. The Bank has made, and will continue to make, changes in the location structure and composition of its offices. The Bank strives to provide facilities and services designed to provide more convenience to the bank's customers and community.*

INSTITUTION RATING

INSTITUTION'S CRA RATING: This institution is rated **Satisfactory**. An institution in this group has a satisfactory record of helping to meet the credit needs of its assessment area, including low- and moderate-income neighborhoods, in a manner consistent with its resources and capabilities.

The Lending Test is rated Satisfactory.

- The loan-to-deposit ratio is reasonable given the institution's size, financial condition, and credit needs of its assessment areas.
- A majority of the bank's home mortgage and small business loans were originated inside the assessment areas.
- The geographic distribution of loans reflects a reasonable dispersion throughout the assessment areas.
- The distribution of borrowers reflects a reasonable penetration among individuals of different income levels and businesses of different sizes.
- The bank did not receive any Community Reinvestment Act (CRA)-related complaints since the previous evaluation. Therefore, this factor did not affect the Lending Test rating.

The Community Development Test is rated Outstanding.

The institution demonstrated an excellent responsiveness to the community development needs of its assessment areas. The institution met those needs through community development loans, qualified investments, and community development services. Examiners considered the institution's capacity and the need and availability of such opportunities for community development in the assessment areas.

DESCRIPTION OF INSTITUTION

First Metro Bank (FMB) is a state-chartered community bank headquartered in Muscle Shoals, Colbert County, Alabama. The bank is a wholly-owned subsidiary of First Metro Bancorp, Muscle Shoals, Alabama, a one-bank holding company. No other affiliate or subsidiary relationships exists, and the bank has not been involved in any merger or acquisition activity since the previous examination. The institution received a Satisfactory rating at its previous FDIC Performance Evaluation, dated May 11, 2020, based on Interagency Intermediate Small Institution Examination Procedures.

FMB operates 11 full-service branches throughout four Alabama counties: Colbert (three), Lauderdale (five), Limestone (two), and Franklin (one). Each branch has an Automated/Interactive Teller Machines (ATM/ITM); and there is one stand-alone, bank-owned ATM located at Helen Keller Hospital in Sheffield, Alabama (Colbert County). Since the previous evaluation, the bank opened a full-service branch in Athens, Limestone County, Alabama, on February 20, 2023; no branches have been closed.

In 2020, the Coronavirus Aid, Relief, and Economic Security Act (CARES Act) was established to offer economic relief to small businesses adversely impacted by the national COVID-19 pandemic. The CARES Act implemented the Paycheck Protection Program (PPP) through the U.S. Small Business Administration. The bank participated in the PPP and extended 668 PPP loans for \$20.3 million during the evaluation period. The program ended on May 31, 2021.

FMB operates as a traditional commercial bank offering a variety of deposit and loan products to both consumer and commercial customers to meet the needs of its communities. Deposit products include checking, savings, money market, certificates of deposit, health savings checking, and individual retirement accounts. Alternative banking services include ATMs/ITMs, telephone banking, text banking, online banking and bill pay, mobile banking, and person-to-person transfers. Commercial lending products offered include commercial real estate, equipment, working capital, inventory, and agricultural loans, and business lines of credit. Consumer loan products include home mortgage, construction and development, recreational and vehicle, personal secured and unsecured, and certificate of deposit secured loans, and home equity lines of credit.

As of the March 31, 2023 Consolidated Reports of Condition and Income (Call Report), FMB had total assets of \$899.1 million, total loans of \$510.4 million (56.8 percent of total assets), and total deposits of \$816.1 million. As shown in the following table, business loans (loans secured by non-farm, non-residential properties and commercial and industrial loans) represented the largest portion of the loan portfolio at 44.6 percent, followed by home mortgage loans (1-4 family residential properties) at 32.7 percent.

Loan Portfolio Distribution as of 3/31/2023		
Loan Category	\$(000s)	%
Construction, Land Development, and Other Land Loans	38,161	7.5
Secured by Farmland	8,494	1.6
Secured by 1-4 Family Residential Properties	166,921	32.7
Secured by Multi-family (5 or more) Residential Properties	39,129	7.7
Secured by Non-farm Non-Residential Properties	163,231	32.0
Total Real Estate Loans	415,936	81.5
Commercial and Industrial Loans	64,365	12.6
Agricultural Production and Other Loans to Farmers	5,642	1.1
Consumer	16,978	3.3
Obligations	7,400	1.5
Other Loans	46	0.0
Less: Unearned Income on Loans	0	0.0
Total Loans	510,367	100.0
<i>Source: Call Report</i>		

The bank provides for the credit needs of its communities in a manner consistent with its size, financial condition, resources, and local economic conditions. Examiners did not identify any financial or legal impediments that affect the bank's ability to meet the assessment areas' credit needs.

DESCRIPTION OF ASSESSMENT AREAS

The CRA requires financial institutions to define assessment areas within which its CRA performance will be evaluated. FMB has delineated three assessment areas, which have not changed since the previous CRA evaluation. The first assessment area includes Colbert and Lauderdale Counties (41 census tracts), which is the Florence-Muscle Shoals, Alabama Metropolitan Statistical Area (MSA). The second assessment area is Franklin County (11 census tracts), part of the Alabama Non-Metropolitan Statistical Area (NMSA). The third assessment area is Limestone County (23 census tracts), part of the Huntsville, Alabama MSA. The combined assessment areas include 75 census tracts. The assessment areas consist of whole census tracts and do not arbitrarily exclude low- or moderate-income areas. The bank has defined the assessment area in accordance with the technical requirements of the CRA regulation. Please see the following table for a breakdown of each assessment area.

Description of Assessment Areas			
Assessment Area (s)	Counties in Assessment Area	# of Census Tracts	# of Branches
Florence-Muscle Shoals, AL MSA	Colbert and Lauderdale	41	8
Huntsville, AL MSA	Limestone	23	2
Alabama NMSA	Franklin	11	1
Total		75	11
<i>Source: Bank Data</i>			

While FMB's assessment areas have not changed since the previous evaluation, U.S. Census Bureau data was updated during the evaluation period from 2010 census information to 2020 census information. The update in census information covers lending analyzed for 2022. States, counties, census tracts, MSAs, and income level indicators were updated. Demographic information, including population and housing characteristics, were also updated. This update resulted in a

change of census tracts in the bank's assessment areas. The Florence-Muscle Shoals, Alabama MSA Assessment Area changed from 36 to 41 census tracts. The number of low-income census tracts remained the same; however, the number of moderate-income census tracts increased from seven to eight. The Huntsville, Alabama MSA Assessment Area increased from 16 to 23 census tracts. Moderate-income census tracts decreased from ten to nine, and there continues to be no low-income census tracts in this assessment area. The Alabama NMSA Assessment Area consisting of Franklin County increased from nine to 11 representing the new designation of both a low- and moderate-income census tract.

The evaluation includes separate discussions for each of the three assessment areas reviewed. Refer to the *Description of Institution's Operations* of each assessment area section for additional information.

SCOPE OF EVALUATION

General Information

This evaluation covers the period from institution's previous CRA on May 11, 2020, to the current evaluation dated June 5, 2023. Examiners used the Intermediate Small Institution Examination Procedures to evaluate FMB's CRA performance. As described in the Appendices, these procedures include the Lending Test. All three assessment areas will be reviewed using full-scope procedures.

Examiners evaluate a bank's lending data, deposit activity, and number of branches to determine which rated areas will receive the most weight in assigning the overall rating. For this evaluation, the Florence-Muscle Shoals MSA Assessment Area has the most lending and deposit activity by dollar volume and the largest branch network. Consequently, the most weight was given to the bank's lending performance in this assessment area.

Activities Reviewed

The CRA regulation requires a review of the lending performance of a bank in its defined assessment area with respect to home mortgage, small business, and small farm loans, if significant. Small farm loans are not a significant product line for the bank and, therefore, examiners did not review this product. As of March 31, 2023, farm loans comprised 2.8 percent of the loan portfolio.

For the Lending Test, examiners reviewed all loans reported pursuant to the Home Mortgage Disclosure Act (HMDA) for 2020 through 2022. There were 795 HMDA loans originated for \$180.1 million. Examiners compared the bank's performance to the respective HMDA aggregate data for 2020 and 2021. Aggregate data for 2022 is not yet available. Examiners also compared the bank's 2020 and 2021 home mortgage lending performance to applicable demographic data based on the 2015 American Community Survey (ACS) data and 2022 lending performance to the 2020 U.S. Census data. Although examiners analyzed HMDA lending data for 2020, 2021, and 2022, examiners presented only 2021 data due to it being the most recent year with aggregate information available. Any anomalies noted in 2020 and 2022 are discussed, as applicable.

This evaluation considered all of the bank’s small business loans originated or renewed in 2022. The bank originated or renewed 488 loans totaling \$47.9 million during this period. Since the bank is not a CRA data reporter and select small business data was not readily available, examiners sampled 80 small business loans totaling \$7.6 million. Examiners compared the bank’s small business lending performance to the applicable Dun & Bradstreet (D&B) business demographic data. Due to the bank’s commercial lending focus and the number of small business loan originations, examiners gave most weight in the overall conclusion to the bank’s small business lending performance.

For the Community Development Test, examiners reviewed the bank’s qualified community development loans, investments, and services since the prior evaluation dated May 11, 2020, to the current evaluation dated June 5, 2023.

CONCLUSIONS ON PERFORMANCE CRITERIA

LENDING TEST

Overall, FMB demonstrated satisfactory performance under the Lending Test. This rating is supported by a reasonable loan-to-deposit ratio; a majority of the loans reviewed being originated within the assessment area; a reasonable geographic distribution of small business loans and home mortgage loans; and a reasonable distribution of the loans to individuals of different income levels and businesses of different sizes. Lastly, no CRA-related complaints were received since the institution’s previous evaluation.

Loan-to-Deposit Ratio

The average net loan-to-deposit ratio (NLTD) is reasonable given the institution’s size, financial condition, and assessment areas’ credit needs. For the 12 previous quarters of Call Report data, FMB recorded a 57.9 percent average NLTD ratio. The ratio ranged from a low of 52.2 percent on March 31, 2022, to a high of 65.4 percent on June 30, 2020, with a fluctuating trend over the analysis period.

To evaluate its reasonableness, a bank’s average NLTD ratio is compared to the ratios of similarly situated banks with similar branching, product lines, and assets that operate in or near the assessment area. The following table shows the average NLTD ratios for FMB and includes one similarly situated institution. As shown in the table, FMB’s average NLTD ratio is comparable to the similarly situated institution.

Loan-to-Deposit Ratio Comparison		
Bank	Total Assets as of 3/31/2023 (\$000s)	Average Net LTD Ratio (%)
First Metro Bank, Muscle Shoals, AL	899,078	57.9
First Southern State Bank, Stevenson, AL	764,304	56.7
<i>Source: Call Reports 5/11/2020 – 3/31/2023</i>		

Assessment Area Concentration

A majority of loans by number and dollar volume are originated within the institution-wide assessment area. Refer to the following table for details.

Lending Inside and Outside of the Assessment Areas										
	Number of Loans					Dollar Amount of Loans \$(000s)				
Loan Category	Inside		Outside		Total	Inside		Outside		Total
	#	%	#	%	#	\$	%	\$	%	\$(000s)
Home Mortgage										
2020	175	76.1	55	23.9	230	30,452	81.2	7,038	18.8	37,490
2021	196	73.1	72	26.9	268	62,434	74.4	21,485	25.6	83,919
2022	225	75.8	72	24.2	297	41,105	70.1	17,565	29.9	58,670

Small Business										
2022	69	86.3	11	13.7	80	7,034	86.0	574	14.0	7,608

Source: 2020, 2021 and 2022 HMDA Data, 2022 Bank Data.

Geographic Distribution

Overall, the geographic distribution of loans reflects reasonable dispersion throughout the assessment areas. This conclusion was based on reasonable dispersion of small business and home mortgage loans. These conclusions are consistent with the conclusions of each rated area with the exception of the Huntsville MSA Assessment Area, where the bank had excellent distribution of small business and home mortgage loans. Examiners focused on the percentage by number of loans in low- and moderate-income census tracts.

Borrower Profile

Overall, the distribution of borrowers reflects, given the demographics of the assessment areas, reasonable penetration among businesses of different sizes and individuals of different income levels (including low- and moderate-income). This conclusion was based on reasonable penetration of small business and home mortgage loans. These conclusions are consistent with the conclusions of each assessment area with the exception of the Huntsville MSA Assessment Area. In this assessment area, the bank had poor penetration of home mortgage loans throughout the assessment area.

Response to Complaints

The bank has not received any CRA-related complaints since the previous evaluation; therefore, this criterion did not affect the Lending Test rating.

COMMUNITY DEVELOPMENT TEST

FMB's community development performance demonstrates excellent responsiveness to the community development needs of the assessment areas. The bank met those needs through community development loans, qualified investments, and community development services. Examiners considered the institution's capacity and the need and availability of such opportunities.

Community Development Loans

FMB originated 51 community development loans totaling \$46.9 million during the evaluation period as detailed in the following table. The dollar amount of community development loans represents 5.2 percent of total assets and 9.2 percent of total loans as of March 31, 2023. By number, 37.3 percent supported affordable housing and 24.0 percent supported economic development.

The following are notable examples of the bank's community development lending:

- In 2021, the bank originated an \$11 million loan to purchase two multi-family apartment complexes with 162 rental units. The units provided monthly rental pricing below the Fair Market Rent (FMR) as determined by U.S. Department of Housing and Urban Development

(HUD) for the Florence-Muscle Shoals MSA. This loan origination provides affordable housing rental options for low-and moderate-income individuals and families.

- In 2022, the bank originated a \$4.7 million loan to construct a 101-room hotel located in a middle-income census tract in the Huntsville-Limestone MSA. Although the hotel is located in a middle-income census tract, the hotel created jobs for 30 low- and moderate-income individuals in the assessment area.

Qualified Investments

FMB made 104 qualified investments totaling approximately \$16.8 million, which includes new investments of \$5.4 million and prior period investments totaling \$11.3 million. This dollar amount represents 1.9 percent of total assets and 4.8 percent total securities. The bank's level of qualified investments is higher than the previous evaluation when total qualified investments equated to 0.4 percent of average total assets and 1.6 percent of average total securities. The bank's investment activity was similar by number and by dollar than similarly situated banks.

Below are notable examples of the bank's qualified investment activities:

- In 2021, the bank invested \$501,000 to revitalize and stabilize the public utility water and sewer services to the residents of the City of Muscle Shoals.
- In 2022, the bank invested \$1.3 million into a Federal Home Loan Mortgage Pool of single-family residences located in Limestone and Madison Counties, Alabama. All borrowers have income levels of low- or moderate-income for their applicable county.

The following community development investment was originated outside of the assessment areas, but within a broader regional area.

- In 2021, the bank invested \$318,000 to help fund improvements to a critical community infrastructure in Eastern Alabama that services low- and moderate-income individuals and families.

Community Development Services

During the evaluation period, FMB's staff provided 154 instances of community development services to a variety of different organizations within each assessment area. The services benefitted the assessment areas by providing financial expertise or technical assistance services to low- and moderate-income individuals. The services included affordable housing, community services, revitalizing or stabilizing the area, and economic development. The bank's service activity was higher than similarly situated banks.

Limestone County Economic Development Association <i>Senior Vice President serves on the Board</i>	Economic Development		2021	Board Member
<i>Source: Bank Data</i>				

In an effort to increase financial services, FMB operates three branches and ATMs in low- or moderate-income census tracts. The branches offer local citizens access to free wireless internet service and meeting space. These branches and ATMs demonstrate the availability of banking

services to low- and moderate- income individuals. FMB also offers free check cashing for checks drawn on First Metro Bank presented for payment by a non-customer.

Additionally, the bank has established six student-operated bank branches in Colbert County High School, Leighton, Alabama; Colbert Heights High School, Tuscumbia, Alabama; Cherokee High School, Cherokee, Alabama; Muscle Shoals High School, Muscle Shoals, Alabama; Florence High School, Florence, Alabama; and, Athens High School, Athens, Alabama. Students selected for staffing learn financial literacy and banking operations and are introduced to career opportunities in the banking industry.

As previously addressed, the bank has assisted 668 customers in obtaining PPP loans as a result of the COVID-19 pandemic. Of the 668 customers, 135 customers obtained PPP loans totaling \$5.8 million that were a direct economic development impact in regard to community development.

DISCRIMINATORY OR OTHER ILLEGAL CREDIT PRACTICES REVIEW

Examiners did not identify any evidence of discriminatory or other illegal credit practices. Therefore, this consideration did not affect the institution's overall CRA rating.

FLORENCE-MUSCLE SHOALS ASSESSMENT AREA – Full-Scope Review

DESCRIPTION OF INSTITUTION’S OPERATIONS IN THE FLORENCE-MUSCLE SHOALS MSA ASSESSMENT AREA

The Florence-Muscle Shoals MSA Assessment Area consists of Colbert and Lauderdale counties. The bank operates eight offices (72.7 percent) in this assessment area. In Colbert County, the main office and two full-service branches are located in middle-income census tracts. In Lauderdale County, one full-service branch is located in a low-income census tract, three full-service branches are located in middle-income census tracts, and one full-service branch is located in an upper-income census tract.

Economic and Demographic Data

According to the 2020 U.S. Census data, this assessment area includes 41 census tracts, which consist of 3 low-, 8 moderate-, 21 middle-, and 8 upper-income census tracts. There is one census tract with no income designation. The following table details demographic characteristics of the assessment area based on the 2020 U.S. Census data and the 2022 D&B data.

Demographic Information of the Assessment Area						
Demographic Characteristics	#	Low % of #	Moderate % of #	Middle % of #	Upper % of #	NA* % of #
Geographies (Census Tracts)	41	7.3	19.5	51.2	19.5	2.4

The *Geographic Distribution* criterion compares home mortgage loans to the distribution of owner-occupied housing units and small business loans to the percentage of businesses located in moderate-, middle-, and upper-income census tracts. As illustrated in the above table, 2.0 percent

of owner-occupied housing units and 10.8 percent of businesses are located in low-income census tracts. Additionally, 14.7 percent of owner-occupied housing units and 17.2 percent of businesses are located in moderate-income census tracts. Further, 9.9 percent of families have incomes below the federal poverty level, which poses a challenge for home mortgage lending to low-income families, as these families likely face difficulty in qualifying for a home mortgage loan.

Examiners used the Federal Financial Institutions Examination Council (FFIEC)-updated median family income figures to analyze home mortgage lending under the *Borrower Profile* criterion. The following table reflects low-, moderate-, middle-, and upper-income categories for 2021 in the assessment area.

Median Family Income Ranges for the Florence-Muscle Shoals, AL MSA (22520)				
Median Family Incomes	Low <50%	Moderate 50% to <80%	Middle 80% to <120%	Upper ≥120%
2021 (\$64,500)	<\$32,250	\$32,250 to <\$51,600	\$51,600 to <\$77,400	≥\$77,400
Source: FFIEC				

The analysis of small business loans under the *Borrower Profile* criterion compares the distribution of small business lending by gross annual revenues. According to 2022 D&B data, gross annual revenues for these businesses are as follows:

- 86.5 percent have \$1 million or less,
- 3.7 percent have more than \$1 million, and
- 9.8 percent have unknown revenues.

Data obtained from the U.S. Bureau of Labor Statistics indicates significant changes in the unemployment rate during the evaluation period. As illustrated in the following table, the assessment area, the state of Alabama, and the national unemployment rate declined from 2020 to 2022 as the economy continued to recover from the COVID-19 pandemic. The assessment area was consistently higher or comparable to the state unemployment rates but lower than the national unemployment rates throughout the period.

Unemployment Rates for the Florence-Muscle Shoals, AL MSA			
Area	2020	2021	2022
	%	%	%
Florence-Muscle Shoals, AL MSA	6.5	3.4	2.8
State of Alabama	6.4	3.4	2.6
National Average	8.1	5.4	3.6
Source: Bureau of Labor Statistics			

According to D&B, the assessment area's largest industries include service industries at 31.5 percent, followed by non-classifiable establishments at 23.1 percent, retail trade at 13.4 percent, and finance, insurance and real estate at 11.1 percent.

According to Moody's *Economy.com, Inc., Précis Metro* dated February 2023; the area's economy is steadily advancing. The labor market ended 2022 on a high note, with total payroll growth outpacing both the state and national rates in the final months of the year. That strong performance

helped to recover all jobs lost early in the pandemic. Manufacturing will be a source of stability with jobs concentrated in transportation equipment manufacturing; however, rising interest rates and general economic uncertainty will make businesses cautious about expanding. In the future, automation and outsourcing will cause job growth to be modest at best. The leisure/hospitality industry will get back on track in 2023. Tourism is a key secondary driver, with the area's reputation as a historic music town making it a popular destination for music enthusiasts. Population growth will continue to lag state and national indicators impacting growth in the housing market and labor force. Low educational attainment within the population will discourage investment in high-tech jobs.

Overall, leisure/hospitality will make solid job gains, but modest growth in core manufacturing industries will also keep employment growth relatively modest. Longer term, slow population, and labor force growth with few high tech jobs will result in below average per capita income. This will cause the area to trail Alabama and the nation across key economic indicators.

Competition

Despite competition, FMB is a leader in deposits in the Florence-Muscle Shoals MSA assessment area. In addition to competing with large national and regional banks, FMB competes with local banks. As of June 30, 2022, 13 FDIC-insured institutions operated 48 offices within the assessment area. The top five banks, by deposit market share, were Bank Independent; First Metro Bank; First Southern Bank; Regions Bank; and CB&S Bank, Inc., accounting for 77.1 percent of the deposit market share. FMB ranked 2nd in deposits with a market share of 21.3 percent.

There is a high level of competition for small business loans. FMB is not required to collect or report its small business loan data, and has not elected to do so. Therefore, the analysis of small business loans under the Lending Test does not include a comparison against aggregate data. The 2021 aggregate data (the most recently available) shows that 74 lenders reported 2,851 small business loans in the assessment area. The top five lenders (by number of loans), accounting for 62.9 percent of the total market share, were Bank Independent; American Express National Bank; Synchrony Bank; JPMorgan Chase, N.A.; and, Capital One Bank (USA), N.A.

There is a high level of competition for home mortgage loans. FMB is required to collect and report its home mortgage loan data. The analysis of home mortgage loans under the Lending Test includes a comparison against aggregate data. The 2021 aggregate data (the most recently available) shows that 286 lenders reported 9,566 home mortgage loans in the assessment area. The top five home mortgage originators (by number of loans), accounting for 33.0 percent of the total market share, were Bank Independent, Regions Bank, Rocket Mortgage, Trustmark National Bank, and Listerhill Credit Union. FMB ranked 14th in home mortgage originations with a market share of 2.0 percent.

Community Contact

Examiners rely on contacts with community organizations to gain insight regarding the credit and community development needs of the bank's assessment area. Individuals interviewed provide information based upon their knowledge and expertise in the housing, business, or economic sectors.

Examiners used an existing community contact who represented an organization that promotes and provides services to businesses in the assessment area. The organization holds multiple events for entrepreneurs and local banks participate. The contact stated that there are approximately 5,000 businesses in the assessment area and there are opportunities for start-up funding. According to the contact, entrepreneurs and recent college graduates who want to start a business do not have many options and may struggle with creditworthiness. The contact noted further that there are no community-based foundations or organizations that could provide the funding for new businesses. The contact also stated that banks are doing a good job overall and are well invested in the organization's goal of promoting business throughout the assessment area.

Credit and Community Development Needs and Opportunities

Considering information from the community contact, demographic information, and economic data, examiners identified certain credit needs and opportunities within the assessment area. The high number of low- and moderate-income families, at 20.6 percent and 18.6 percent, respectively, indicates a continuing need for affordable housing. Additionally, the high median age of housing stock in low- and moderate-income census tracts, at 56 and 53 years, respectively indicates a significant need for home improvement loans. Further, a need for loans supporting small businesses is evident, as small businesses comprise a significant majority at 86.5 percent of the assessment area's businesses with gross annual revenues of \$1 million or less supports this conclusion.

CONCLUSIONS ON PERFORMANCE CRITERIA IN THE FLORENCE-MUSCLE SHOALS MSA ASSESSMENT AREA

LENDING TEST

FMB's geographic distribution of loans reflects reasonable dispersion throughout the assessment area. This conclusion was based on reasonable geographic distribution of small business and home mortgage loans. Additionally, the distribution of borrowers reflects, given the demographics of the assessment area, reasonable penetration among businesses of different sizes and individuals of different income levels (including low- and moderate-income). The reasonable distribution of small business loans supports this conclusion. Only those loans originated inside the assessment area are included in the analyses.

Geographic Distribution

Overall, the geographic distribution of loans reflects reasonable dispersion throughout the assessment area. This conclusion is supported by the reasonable dispersion of small business and home mortgage loans.

Small Business Loans

The geographic distribution of small business loans reflects reasonable dispersion. Lending performance in low-income census tracts was below demographic data. The bank's performance in moderate-income census tracts was comparable to demographic data. The following table reflects the distribution of small business loans by income level of census tracts.

Borrower Profile

The distribution of borrowers reflects, given the demographics of the assessment area, reasonable penetration among individuals of different income levels and businesses of different sizes.

Small Business Loans

The distribution of borrowers reflects a reasonable penetration among businesses of different sizes. The bank's performance is below the percentage of businesses with gross annual revenues of \$1.0 million or less. It is noted that revenue was not available for ten or 21.3 percent of borrowers. If those loans are excluded, 78.4 percent of the loans have gross annual revenues of \$1 million or less.

Distribution of Small Business Loans by Gross Annual Revenue Category					
Gross Revenue Level	% of Businesses	#	%	\$(000s)	%
<=\$1,000,000					
2022	86.5	29	61.7	3,376	57.2
>1,000,000					
2022	3.7	8	17.0	2,050	34.8
Revenue Not Available					
2022	9.8	10	21.3	473	8.0
Total					
2022	100.0	47	100.0	5,899	100.0
Source: 2022 D&B Data; 1/1/2022 - 12/31/2022 Bank Data. Due to rounding, totals may not equal 100.0 percent.					

Home Mortgage Loans

Lending to borrowers of different income levels reflects reasonable penetration. As shown in the following table, lending to low-income borrowers was comparably below aggregate lending and significantly below demographic data, but is considered reasonable. Lending performance to moderate-income borrowers was below demographics and aggregate lending, but is reasonable.

Distribution of Home Mortgage Loans by Borrower Income Level						
Borrower Income Level	% of Families	Aggregate Performance % of #	#	%	\$(000s)	%

COMMUNITY DEVELOPMENT TEST

FMB demonstrates excellent responsiveness to community development needs in its assessment area through community development loans, qualified investments, and community development services. Examiners considered the bank's capacity and the needs and availability of such opportunities for community development in the Florence-Muscle Shoals MSA assessment area.

Community Development Loans

During the evaluation period, the bank originated 45 community development loans totaling approximately \$35.8 million. Refer to the overall Community Development Loans section beginning on page 7 for notable examples of activity within this assessment area.

Qualified Investments

During the evaluation period, the bank made 14 qualified investments and 54 qualified donations totaling \$5.8 million. All of the investments were made to organizations that supported community development activities in the assessment area. Refer to the overall Qualified Investments section beginning on page 8 for notable examples of activity within this assessment area.

Community Development Services

During the evaluation period, bank management and other employees provided 128 instances of financial expertise, technical assistance, or financial literacy in the assessment area. Refer to the overall Community Development Services section beginning on page 9 for notable examples of activity within this assessment area.

HUNTSVILLE MSA ASSESSMENT AREA – Full-Scope Review

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE HUNTSVILLE MSA ASSESSMENT AREA

The Huntsville MSA Assessment Area consists of Limestone County. The bank operates two offices (18.2 percent) in this assessment area. The branches are located in a moderate- and upper-income census tract.

Economic and Demographic Data

According to the 2020 U.S. Census data, this assessment area includes 23 census tracts, which consist of nine moderate-, nine middle-, and five upper-income census tracts. There are no low-income census tracts in the assessment area. The following table details demographic characteristics of the assessment area based on the 2020 U.S. Census data and the 2022 D&B data.

Demographic Information of the Assessment Area						
Demographic Characteristics	#	Low % of #	Moderate % of #	Middle % of #	Upper % of #	NA* % of #

Source: 2020 U.S. Census and 2022 D&B Data. Due to rounding, totals may not equal 100.0 percent. (*) The NA category consists of geographies that have not been assigned an income classification.						

The *Geographic Distribution* criterion compares home mortgage loans to the distribution of owner-occupied housing units and small business loans to the percentage of businesses located in moderate-, middle-, and upper-income census tracts. As illustrated in the above table, 28.8 percent of owner-occupied housing units and 30.1 percent of businesses are located in moderate-income census tracts. Further, 8.7 percent of families have incomes below the federal poverty level, which poses a challenge for home mortgage lending to low-income families, as these families likely face difficulty in qualifying for a home mortgage loan.

Examiners used the FFIEC-updated median family income figures to analyze home mortgage lending under the *Borrower Profile* criterion. The following table reflects low-, moderate-, middle-, and upper-income categories for 2021 in the assessment area.

Median Family Income Ranges for the Huntsville, AL MSA (26620)				
Median Family Incomes	Low <50%	Moderate 50% to <80%	Middle 80% to <120%	Upper ≥120%
2021 (\$82,900)	<\$41,450	\$41,450 to <\$66,320	\$66,320 to <\$99,480	≥\$99,480
Source FFIEC				

The analysis of small business loans under the *Borrower Profile* criterion compares the distribution of small business lending by gross annual revenues. According to 2022 D&B data, gross annual revenues for these businesses are as follows:

- 90.3 percent have \$1 million or less,
- 2.4 percent have more than \$1 million, and
- 7.3 percent have unknown revenues.

Data obtained from the U.S. Bureau of Labor Statistics indicates significant changes in the unemployment rate during the evaluation period. As illustrated in the following table, the assessment area, the state of Alabama, and the national unemployment rate declined from 2020 to 2022 as the economy continued to recover from the COVID-19 pandemic. The assessment area was consistently lower than the state and national unemployment rates throughout the period.

Unemployment Rates for the Huntsville, AL MSA (26620)			
Area	2020	2021	2022
	%	%	%
Huntsville, AL MSA	4.7	2.4	2.1
State of Alabama	6.4	3.4	2.6
National Average	8.1	5.4	3.6
<i>Source: Bureau of Labor Statistics</i>			

According to D&B, the assessment area's largest industries include service industries at 31.3 percent, followed by non-classifiable establishments at 25.0 percent, and retail trade at 10.8 percent. According to the Limestone Economic Development Council, major employers in Limestone County include Target Distribution (2,000), Polaris (1,996), Tennessee Valley Authority (1,500), Limestone County Schools (1,100), and Steelcase (975), collectively employing 7,571 individuals.

According to Moody's *Economy.com, Inc., Précis Metro* dated February 2023; the Huntsville economy is advancing. Job growth accelerated in the fourth quarter and annual growth is now less than a percentage point behind the region. The public sector is performing well. Industry job growth is roughly triple the South's average despite weakness among goods producers who are struggling with supply chain issues. The unemployment rate has inched higher in recent months due to a surge of new labor force entrants but remains low. The housing market is cooling rapidly but house price appreciation is still up. Manufacturing in the auto industry will support overall growth in the metro area over the coming year. The completion of the Mazda-Toyota plant resulted in a hiring surge. Longer term, the new facility will be a growth driver and encourage expansion of auto suppliers and downstream companies. Additionally, the military aerospace industry will support growth in high-tech services over the coming year.

Demographics and other structural factors are positive and population growth has significantly outpaced that of the nation over the past decade; this is expected to continue in coming years, boosting consumer services and housing. The labor pool is well trained, with the percentage of adults with a bachelor's degree or above several percentage points higher than the national average.

Huntsville's economy will expand at about the same pace as the nation's in the near term, driven mainly by professional services and manufacturing. Longer term, the concentrations of manufacturing and aerospace-related industries, a highly educated labor force, and above-average population growth will enable the metro area to outperform Alabama and the nation.

Competition

There is a high level of competition for financial services in the assessment area. In addition to competing with national banks, FMB competes with larger regional and local banks. As of June 30, 2022, 10 FDIC-insured institutions operated 17 offices within the assessment area. The banks, by

deposit market share, were Regions Bank; First National Bank of Pulaski; Trustmark National Bank; PNC Bank, N.A.; and, Bank Independent. Collectively, these five banks account for 93.8 percent of the deposit market share. FMB ranked 6th in deposits with a market share of 2.9 percent.

There is a high level of competition for small business loans. FMB is not required to collect or report its small business loan data, and has not elected to do so. Therefore, the analysis of small business loans under the Lending Test does not include a comparison against aggregate data. The 2021 aggregate data (the most recently available) shows that 74 lenders reported 1,634 small business loans in the assessment area. The top five lenders (by number of loans), accounting for 49.4 percent of the total market share, were American Express National Bank; Bank Independent; Synchrony Bank; JPMorgan Chase Bank, N.A.; and, Capital One Bank, N.A.

There is a high level of competition for home mortgage loans. FMB is required to collect and report its home mortgage loan data. The analysis of home mortgage loans under the Lending Test includes a comparison against aggregate data. The 2021 aggregate data (the most recently available) shows that 332 lenders reported 10,906 home mortgage loans in the assessment area. The top five home mortgage originators (by number of loans), accounting for 26.1 percent of the total market share, were Redstone Federal Credit Union; Rocket Mortgage; Freedom Mortgage Corporation; Pennymac Loan Services, LLC; and, Wells Fargo Bank, N.A. FMB ranked 63rd in home mortgage originations with a market share of 0.3 percent.

Credit and Community Development Needs and Opportunities

Considering information based on demographic information and economic data, examiners identified certain credit needs and opportunities within the assessment area. The high number of low- and moderate-income families, at 23.1 percent and 19.9 percent, respectively, indicates a continuing need for affordable housing. Additionally, the high median age of housing stock in moderate-income census tracts, at 37 years, indicates a significant need for home improvement loans. Further, a need for loans supporting small businesses is evident, as small businesses comprise a significant majority at 90.3 percent of the assessment area's businesses with gross annual revenues of \$1 million or less supports this conclusion.

CONCLUSIONS ON PERFORMANCE CRITERIA IN THE HUNTSVILLE MSA ASSESSMENT AREA

LENDING TEST

FMB's geographic distribution of loans reflects excellent dispersion within the Huntsville MSA Assessment Area. This conclusion was based on excellent geographic distribution of small business and home mortgage loans. Additionally, the distribution of borrowers reflects, given the demographics of the assessment area, reasonable penetration among businesses of different sizes and poor penetration among individuals of different income levels (including low- and moderate-income). The reasonable distribution of small business loans supports this conclusion. Only those loans originated inside the assessment area are included in the analyses.

Geographic Distribution

The geographic distribution of loans reflects excellent dispersion throughout the assessment area. This conclusion is based on the excellent dispersion of small business and home mortgage loans. There are no low-income census tracts in this assessment area.

Small Business Loans

The geographic distribution of small business loans reflects excellent dispersion. Lending performance in moderate-income census tracts significantly exceeded demographic data. The following table reflects the distribution of small business loans by income level of census tracts.

Geographic Distribution of Small Business Loans					
Tract Income Level	% of Businesses	#	%	\$(000s)	%
Moderate					
2022	30.1	6	60.0	846	87.0
Middle					
2022	42.1	3	30.0	116	12.0
Upper					
2022	27.8	1	10.0	10	1.0

2022	0.0	0	0.0	0	0.0
Totals					
	100.0	10	100.0	972	100.0
<i>Source: 2022 U.S. Census; 1/1/2022 - 12/31/2022 Bank Data. Due to rounding, totals may not equal 100.0 percent.</i>					

Home Mortgage Loans

The geographic distribution of home mortgage loans reflects excellent dispersion. The bank's home mortgage lending in moderate-income census tracts significantly exceeded aggregate lending and was comparable to demographic data. The following table details the distribution of home mortgage loans by income level of census tracts.

Geographic Distribution of Home Mortgage Loans						
Tract Income Level	% of Owner-Occupied Housing Units	Aggregate Performance % of #	#	%	\$(000s)	%
Moderate						
2021	47.9	29.3	15	45.5	2,745	31.8

Borrower Profile

Overall, the distribution of borrowers reflects, given the demographics of the assessment area, reasonable penetration among businesses of different sizes, and poor penetration among individuals of different income levels. This conclusion was based on reasonable penetration of small business loans.

Small Business Loans

The distribution of borrowers reflects reasonable penetration among businesses of different sizes. As shown in the following table, the bank's performance is below the percentage of businesses with gross annual revenues of \$1.0 million or less. It is noted that the four loans with gross annual revenue greater than \$1 million represent one borrower. Revenue was not available for 7.3 percent of businesses in the area and 20.0 percent of borrowers. If these were excluded, the bank's performance increases slightly to 50.0 percent of the loans having gross annual revenues of \$1 million or less.

Distribution of Small Business Loans by Gross Annual Revenue Category					
Gross Revenue Level	% of Businesses	#	%	\$(000s)	%
<=\$1,000,000					
2022	90.3	4	40.0	140	14.4
>1,000,000					
2022	2.4	4	40.0	618	63.6
Revenue Not Available					
2022	7.3	2	20.0	214	22.0
Total

<i>Source: 2022 D&B Data; 1/1/2022 - 12/31/2022 Bank Data. Due to rounding, totals may not equal 100.0 percent.</i>					

Home Mortgage Loans

Lending to borrowers of different income levels reflects poor penetration. As shown in the following table, the bank did not originate any loans to low-income borrowers. However, there is limited lending opportunities available in these tracts, as reflected by lower aggregate performance. In addition, families living below the poverty level at 8.7 percent would not readily qualify for a conventional home mortgage loan given the median housing value of \$176,425. Lending to moderate-income borrowers was significantly below both aggregate lending and demographic data. It is also noted that eight loans (24.2 percent) were made to businesses for investment purposes, where income is not applicable.

The bank's home mortgage lending performance has fluctuated from 2020 to 2022. In 2020, lending to low- and moderate-income borrowers was below aggregate lending and demographic data, but considered reasonable. In 2022, lending to moderate-income borrowers increased significantly (23.1 percent) and exceeded the percentage of moderate-income families (19.9 percent).

COMMUNITY DEVELOPMENT TEST

FMB demonstrates excellent responsiveness to community development needs in its assessment area through community development loans, qualified investments, and community development services. Examiners considered the bank's capacity and the needs and availability of such opportunities for community development in the Huntsville-Limestone MSA assessment area.

Community Development Loans

During the evaluation period, FMB originated five community development loans totaling \$10.0 million. Below is a notable example of community development loan activity within this assessment area. Refer to the overall Community Development Loans section beginning on page 7 for other examples.

- In 2022, the bank originated a \$2.5 million loan to purchase and renovate a hotel in the Huntsville-Limestone MSA. The hotel created 25 jobs for low- and moderate-income individuals in the assessment area

Qualified Investments

During the evaluation period, the bank made two qualified investments and six qualified donations totaling \$1.9 million. All of the investments were made to organizations that supported community development activities in the assessment area. Refer to the overall Qualified Investments section beginning on page 8 and below for notable examples of activity within this assessment area.

- In 2022, the bank donated \$850 to an organization affiliated with a hospital that serves low- and moderate-income communities in the Huntsville-Limestone MSA.
- In 2023, the bank donated \$500 to an organization in the Huntsville-Limestone MSA that serves families who make between 25 percent and 60 percent of the area median income, which includes low- and moderate-income individuals.

Community Development Services

During the evaluation period, bank management and other employees provided 12 instances of financial expertise, technical assistance, or financial literacy in the assessment area. Below are notable example of community development loan activity notable examples of activity within this assessment area.

- In 2022, two lending employees volunteered on six occasions to teach financial literacy to students at an elementary school in Limestone County.
- In 2021, a branch manager served on the Board of the Athens-Limestone Hospital Foundation by approving the budgets and the monthly financials for the organization.

ALABAMA NMSA ASSESSMENT AREA – Full-Scope Review

DESCRIPTION OF INSTITUTION’S OPERATIONS IN THE ALABAMA NMSA ASSESSMENT AREA

The Alabama NMSA Assessment Area consists of Franklin County. The bank operates one office (9.1 percent) in this assessment area, which is located in a middle-income census tract.

Economic and Demographic Data

According to the 2020 U.S. Census data, this assessment area includes 11 census tracts, which consist of one low-, one moderate-, eight middle-, and one upper-income census tracts. The following table details demographic characteristics of the assessment area based on the 2020 U.S. Census data and the 2022 D&B data.

Demographic Information of the Assessment Area						
Demographic Characteristics	#	Low % of #	Moderate % of #	Middle % of #	Upper % of #	NA* % of #
Geographies (Census Tracts)	11	9.1	9.1	72.7	9.1	0.0

Median Family Income MSA - Alabama NMSAs (99999)		\$55,960	Median Housing Value			\$105,326
			Median Gross Rent			\$563
			Families Below Poverty Level			16.2%
Source: 2020 U.S. Census and 2022 D&B Data. Due to rounding, totals may not equal 100.0 percent. (*) The NA category consists of geographies that have not been assigned an income classification.						

The *Geographic Distribution* criterion compares home mortgage loans to the distribution of owner-occupied housing units and small business loans to the percentage of businesses located in moderate-, middle-, and upper-income census tracts. As illustrated in the above table, 5.3 percent of owner-occupied housing units and 4.1 percent of businesses are located in low-income census tracts. Additionally, 10.0 percent of owner-occupied housing units and 8.6 percent of businesses are located in moderate-income census tracts. Further, 16.2 percent of families have incomes below the federal poverty level, which poses a significant challenge for home mortgage lending to low-income families, as these families likely face difficulty in qualifying for a home mortgage loan.

The analysis of small business loans under the *Borrower Profile* criterion compares the distribution of small business lending by gross annual revenues. According to 2022 D&B data, gross annual revenues for these businesses are as follows:

- 83.4 percent have \$1 million or less,
- 3.9 percent have more than \$1 million, and
- 12.7 percent have unknown revenues.

Data obtained from the U.S. Bureau of Labor Statistics indicates significant changes in the unemployment rate during the evaluation period. As illustrated in the following table the assessment area, the state of Alabama, and the national unemployment rate declined from 2020 to 2022 as the economy continued to recover from the COVID-19 pandemic. The assessment area was consistently lower than the state and national unemployment rates throughout the period.

Unemployment Rates for the Alabama NMSA (99999)			
Area	2020	2021	2022
	%	%	%
Alabama NMSA	4.9	2.5	2.3
State of Alabama	6.4	3.4	2.6
National Average	8.1	5.4	3.6
Source: Bureau of Labor Statistics			

According to D&B, the assessment area's largest industries include service industries at 28.4 percent, followed by non-classifiable establishments at 21.2 percent, and retail trade at 14.6 percent. According to the Franklin County Development Authority, major employers in Franklin County include Tiffin MotorHomes, Inc. (1,215), Pilgrim's (1,000), Franklin County Board of Education (454), Sunshine Mills (450), and Innovative Hearth Products (425), collectively employing 3,544 individuals.

Competition

There is a high level of competition for financial services in the assessment area. In addition to competing with larger regional banks, FMB competes with local banks. As of June 30, 2022, five FDIC-insured institutions operated 17 offices within the assessment area. The banks, by deposit market share, were CB&S Bank, Inc.; Community Spirit Bank; Valley State Bank; Bank Independent; and, First Metro Bank. Collectively, these five banks account for 100.0 percent of the deposit market share. FMB ranked 5th in deposits with a market share of 4.9 percent.

There is a high level of competition for small business loans. FMB is not required to collect or report its small business loan data, and has not elected to do so. Therefore, the analysis of small business loans under the Lending Test does not include a comparison against aggregate data. Aggregate data from 2021 is the most recently available data. The 2021 aggregate data shows that 42 lenders reported 418 small business loans in the assessment area. The top five lenders (by number of loans), accounting for 64.8 percent of the total market share, were CB&S Bank Inc.; American Express National Bank; Bank Independent; Synchrony Bank; and, JPMorgan Chase Bank, N.A.

There is a high level of competition for home mortgage loans. FMB is required to collect and report its home mortgage loan data. The analysis of home mortgage loans under the Lending Test includes a comparison against aggregate data. Aggregate data from 2021 is the most recently available data. The 2021 aggregate data shows that 121 lenders reported 1,001 home mortgage loans in the assessment area. The top five home mortgage originators (by number of loans), accounting for 37.5 percent of the total market share, were CB&S Bank Inc.; Rocket Mortgage; Listerhill Credit Union; 21st Mortgage; and, Community Bank, N.A. FMB did not originate any home mortgage loan in the assessment area in 2021.

Credit and Community Development Needs and Opportunities

Considering information based on demographic information and economic data, examiners identified certain credit needs and opportunities within the assessment area. The high number of low- and moderate-income families, at 27.3 percent and 17.2 percent, respectively, indicates a continuing need for affordable housing. Additionally, the high median age of housing stock in low- and moderate-income census tracts, at 42 and 37 years, respectively, indicates a significant need for home improvement loans. Further, a need for loans supporting small businesses is evident, as small businesses comprise a significant majority at 83.4 percent of the assessment area's businesses with gross annual revenues of \$1 million or less supports this conclusion.

CONCLUSIONS ON PERFORMANCE CRITERIA IN THE ALABAMA NMSA ASSESSMENT AREA

LENDING TEST

FMB's geographic distribution of loans reflects reasonable dispersion within the Alabama NMSA Assessment Area. This conclusion was based on reasonable geographic distribution of small business loans. Additionally, the distribution of borrowers reflects, given the demographics of the assessment area, reasonable penetration among businesses of different sizes. The reasonable distribution of small business loans supports this conclusion. FMB did not originate any home mortgage loans in the assessment area during the review period. Only those loans originated inside the assessment area are included in the analyses.

Geographic Distribution

Overall, the geographic distribution of loans reflects reasonable dispersion throughout the assessment area. This conclusion is based on the reasonable dispersion of small business loans.

Small Business Loans

The geographic distribution of small business loans reflects reasonable dispersion. Lending performance in the one low-income census tract exceeds the demographic data. The bank did not originate any small business loans in the one moderate-income census tract in the assessment area. The following table reflects the distribution of small business loans by income level of census tracts.

Geographic Distribution of Small Business Loans					
Tract Income Level	% of Businesses	#	%	\$(000s)	%
Low					
2022	4.1	1	8.3	47	28.8

Borrower Profile

The distribution of borrowers reflects, given the demographics of the assessment area, reasonable penetration among businesses of different sizes.

Small Business Loans

The distribution of borrowers reflects a reasonable penetration among businesses of different sizes. The bank's performance is below the percentage of businesses with gross annual revenues of \$1million or less. It is noted that revenue was not available for 12.7 percent of businesses in the area and 41.7 percent of borrowers. If these were excluded, the bank's performance increases to 85.7 percent, which is comparable to demographics.

Distribution of Small Business Loans by Gross Annual Revenue Category

COMMUNITY DEVELOPMENT TEST

FMB demonstrates excellent responsiveness to community development needs in its assessment area through community development loans, qualified investments, and community development services. Examiners considered the bank's capacity and the needs and availability of such opportunities for community development in the NMSA Assessment Area.

Community Development Loans

During the evaluation period, the bank originated one community development loan totaling approximately \$1.2 million to construct a store in a middle-income census tract. Although the store is located in a middle-income census tract, its target market is fixed-income households.

Qualified Investments

During the evaluation period, the bank made 18 qualified donations totaling \$2,800. All of the donations were made to organizations that supported community development activities in the assessment area. Below are notable examples of activity within this assessment area.

- In 2021, the bank donated \$250 to a non-profit organization to promote community service by assisting with scholarships for students in a low-or moderate-income area within Franklin County.
- In 2023, the bank donated \$250 to a school in Franklin County that serves low-or moderate-income families.

Community Development Services

During the evaluation period, bank management and other employees provided 14 instances of financial expertise, technical assistance, or financial literacy in the assessment area. Below are notable examples of activity within this assessment area.

- In 2022, an employee volunteered on two occasions to teach financial literacy to students at an elementary school in Franklin County.
- In 2023, a manager volunteered on three occasions to teach financial literacy to students a high school in Franklin County.

APPENDICES

INTERMEDIATE SMALL BANK PERFORMANCE CRITERIA

Lending Test

The Lending Test evaluates the bank's record of helping to meet the credit needs of its assessment area(s) by considering the following criteria:

- 1) The bank's loan-to-deposit ratio, adjusted for seasonal variation, and, as appropriate, other lending-related activities, such as loan originations for sale to the secondary markets, community development loans, or qualified investments;
- 2) The percentage of loans, and as appropriate, other lending-related activities located in the bank's assessment area(s);
- 3) The geographic distribution of the bank's loans;
- 4) The bank's record of lending to and, as appropriate, engaging in other lending-related activities for borrowers of different income levels and businesses and farms of different sizes; and
- 5) The bank's record of taking action, if warranted, in response to written complaints about its performance in helping to meet credit needs in its assessment area(s).

Community Development Test

The Community Development Test considers the following criteria:

- 1) The number and amount of community development loans;
- 2) The number and amount of qualified investments;
- 3) The extent to which the bank provides community development services; and
- 4) The bank's responsiveness through such activities to community development lending, investment, and service needs.

GLOSSARY

Aggregate Lending: The number of loans originated and purchased by all reporting lenders in specified income categories as a percentage of the aggregate number of loans originated and purchased by all reporting lenders in the metropolitan area/assessment area.

American Community Survey (ACS): A nationwide United States Census survey that produces demographic, social, housing, and economic estimates in the form of five year estimates based on population thresholds.

Area Median Income: The median family income for the MSA, if a person or geography is located in an MSA; or the statewide nonmetropolitan median family income, if a person or geography is located outside an MSA.

Assessment Area: A geographic area delineated by the bank under the requirements of the Community Reinvestment Act.

Census Tract: A small, relatively permanent statistical subdivision of a county or equivalent entity. The primary purpose of census tracts is to provide a stable set of geographic units for the presentation of statistical data. Census tracts generally have a population size between 1,200 and 8,000 people, with an optimum size of 4,000 people. Census tract boundaries generally follow visible and identifiable features, but they may follow nonvisible legal boundaries in some instances. State and county boundaries always are census tract boundaries.

Combined Statistical Area (CSA): A combination of several adjacent metropolitan statistical areas or micropolitan statistical areas or a mix of the two, which are linked by economic ties.

Community Development: For loans, investments, and services to qualify as community development activities, their primary purpose must:

- (1) Support affordable housing for low- and moderate-income individuals;
- (2) Target community services toward low- and moderate-income individuals;
- (3) Promote economic development by financing small businesses or farms; or
- (4) Provide activities that revitalize or stabilize low- and moderate-income geographies, designated disaster areas, or distressed or underserved nonmetropolitan middle-income geographies.

Community Development Corporation (CDC): A CDC allows banks and holding companies to make equity type of investments in community development projects. Institution CDCs can develop innovative debt instruments or provide near-equity investments tailored to the development needs of the community. Institution CDCs are also tailored to their financial and marketing needs. A CDC may purchase, own, rehabilitate, construct, manage, and sell real property. Also, it may make equity or debt investments in development projects and in local businesses. The CDC activities are expected to directly benefit low- and moderate-income groups, and the investment dollars should not represent an undue risk on the banking organization.

Community Development Financial Institutions (CDFIs): CDFIs are private intermediaries (either for profit or nonprofit) with community development as their primary mission. A CDFI facilitates the flow of lending and investment capital into distressed communities and to individuals who have been unable to take advantage of the services offered by traditional financial institutions. Some basic types of CDFIs include community development banks, community development loan funds, community development credit unions, micro enterprise funds, and community development venture capital funds.

A certified CDFI must meet eligibility requirements. These requirements include the following:

- Having a primary mission of promoting community development;
- Serving an investment area or target population;
- Providing development services;
- Maintaining accountability to residents of its investment area or targeted population through representation on its governing board of directors, or by other means;
- Not constituting an agency or instrumentality of the United States, of any state or political subdivision of a state.

Community Development Loan: A loan that:

- (1) Has as its primary purpose community development; and
- (2) Except in the case of a wholesale or limited purpose institution:
 - (i) Has not been reported or collected by the institution or an affiliate for consideration in the institution's assessment area as a home mortgage, small business, small farm, or consumer loan, unless it is a multifamily dwelling loan (as described in Appendix A to Part 203 of this title); and
 - (ii) Benefits the institution's assessment area(s) or a broader statewide or regional area including the institution's assessment area(s).

Community Development Service: A service that:

- (1) Has as its primary purpose community development;
- (2) Is related to the provision of financial services; and
- (3) Has not been considered in the evaluation of the institution's retail banking services under § 345.24(d).

Consumer Loan(s): A loan(s) to one or more individuals for household, family, or other personal expenditures. A consumer loan does not include a home mortgage, small business, or small farm loan. This definition includes the following categories: motor vehicle loans, credit card loans, home equity loans, other secured consumer loans, and other unsecured consumer loans.

Core Based Statistical Area (CBSA): The county or counties or equivalent entities associated with at least one core (urbanized area or urban cluster) of at least 10,000 population, plus adjacent counties having a high degree of social and economic integration with the core as measured through commuting ties with the counties associated with the core. Metropolitan and Micropolitan Statistical Areas are the two categories of CBSAs.

Distressed Middle-Income Nonmetropolitan Geographies: A nonmetropolitan middle-income geography will be designated as distressed if it is in a county that meets one or more of the following triggers:

- (1) An unemployment rate of at least 1.5 times the national average;
- (2) A poverty rate of 20 percent or more; or
- (3) A population loss of 10 percent or more between the previous and most recent decennial census or a net migration loss of 5 percent or more over the 5-year period preceding the most recent census.

Family: Includes a householder and one or more other persons living in the same household who are related to the householder by birth, marriage, or adoption. The number of family households always equals the number of families; however, a family household may also include non-relatives living with the family. Families are classified by type as either a married-couple family or other family. Other family is further classified into “male householder” (a family with a male householder and no wife present) or “female householder” (a family with a female householder and no husband present).

FFIEC-Estimated Income Data: The Federal Financial Institutions Examination Council (FFIEC) issues annual estimates which update median family income from the metropolitan and nonmetropolitan areas. The FFIEC uses American Community Survey data and factors in information from other sources to arrive at an annual estimate that more closely reflects current economic conditions.

Full-Scope Review: A full-scope review is accomplished when examiners complete all applicable interagency examination procedures for an assessment area. Performance under applicable tests is analyzed considering performance context, quantitative factors (e.g., geographic distribution, borrower profile, and total number and dollar amount of investments), and qualitative factors (e.g., innovativeness, complexity, and responsiveness).

Geography: A census tract delineated by the United States Bureau of the Census in the most recent decennial census.

Home Mortgage Disclosure Act (HMDA): The statute that requires certain mortgage lenders that do business or have banking offices in a metropolitan statistical area to file annual summary reports of their mortgage lending activity. The reports include such data as the race, gender, and the income of applicants; the amount of loan requested; and the disposition of the application (approved, denied, and withdrawn).

Home Mortgage Loans: Includes closed-end mortgage loans or open-end line of credits as defined in the HMDA regulation that are not an excluded transaction per the HMDA regulation.

Housing Unit: Includes a house, an apartment, a mobile home, a group of rooms, or a single room that is occupied as separate living quarters.

Limited-Scope Review: A limited scope review is accomplished when examiners do not complete all applicable interagency examination procedures for an assessment area.

Performance under applicable tests is often analyzed using only quantitative factors (e.g., geographic distribution, borrower profile, total number and dollar amount of investments, and branch distribution).

Low-Income: Individual income that is less than 50 percent of the area median income, or a median family income that is less than 50 percent in the case of a geography.

Low Income Housing Tax Credit: The Low-Income Housing Tax Credit Program is a housing program contained within the Internal Revenue Code of 1986, as amended. It is administered by the U.S. Department of the Treasury and the Internal Revenue Service. The U.S. Treasury Department distributes low-income housing tax credits to housing credit agencies through the Internal Revenue Service. The housing agencies allocate tax credits on a competitive basis.

Developers who acquire, rehabilitate, or construct low-income rental housing may keep their tax credits. Or, they may sell them to corporations or investor groups, who, as owners of these properties, will be able to reduce their own federal tax payments. The credit can be claimed annually for ten consecutive years. For a project to be eligible, the developer must set aside a specific percentage of units for occupancy by low-income residents. The set-aside requirement remains throughout the compliance period, usually 30 years.

Market Share: The number of loans originated and purchased by the institution as a percentage of the aggregate number of loans originated and purchased by all reporting lenders in the metropolitan area/assessment area.

Median Income: The median income divides the income distribution into two equal parts, one having incomes above the median and other having incomes below the median.

Metropolitan Division (MD): A county or group of counties within a CBSA that contain(s) an urbanized area with a population of at least 2.5 million. A MD is one or more main/secondary counties representing an employment center or centers, plus adjacent counties associated with the main/secondary county or counties through commuting ties.

Metropolitan Statistical Area (MSA): CBSA associated with at least one urbanized area having a population of at least 50,000. The MSA comprises the central county or counties or equivalent entities containing the core, plus adjacent outlying counties having a high degree of social and economic integration with the central county or counties as measured through commuting.

Middle-Income: Individual income that is at least 80 percent and less than 120 percent of the area median income, or a median family income that is at least 80 and less than 120 percent in the case of a geography.

Moderate-Income: Individual income that is at least 50 percent and less than 80 percent of the area median income, or a median family income that is at least 50 and less than 80 percent in the case of a geography.

Multi-family: Refers to a residential structure that contains five or more units.

Nonmetropolitan Area (also known as **non-MSA**): All areas outside of metropolitan areas. The definition of nonmetropolitan area is not consistent with the definition of rural areas. Urban and rural classifications cut across the other hierarchies. For example, there is generally urban and rural territory within metropolitan and nonmetropolitan areas.

Owner-Occupied Units: Includes units occupied by the owner or co-owner, even if the unit has not been fully paid for or is mortgaged.

Qualified Investment: A lawful investment, deposit, membership share, or grant that has as its primary purpose community development.

Rated Area: A rated area is a state or multistate metropolitan area. For an institution with domestic branches in only one state, the institution's CRA rating would be the state rating. If an institution maintains domestic branches in more than one state, the institution will receive a rating for each state in which those branches are located. If an institution maintains domestic branches in two or more states within a multistate metropolitan area, the institution will receive a rating for the multistate metropolitan area.

Rural Area: Territories, populations, and housing units that are not classified as urban.

Small Business Investment Company (SBIC): SBICs are privately-owned investment companies which are licensed and regulated by the Small Business Administration (SBA). SBICs provide long-term loans and/or venture capital to small firms. Because money for venture or risk investments is difficult for small firms to obtain, SBA provides assistance to SBICs to stimulate and supplement the flow of private equity and long-term loan funds to small companies. Venture capitalists participate in the SBIC program to supplement their own private capital with funds borrowed at favorable rates through SBA's guarantee of SBIC debentures. These SBIC debentures are then sold to private investors. An SBIC's success is linked to the growth and profitability of the companies that it finances. Therefore, some SBICs primarily assist businesses with significant growth potential, such as new firms in innovative industries. SBICs finance small firms by providing straight loans and/or equity-type investments. This kind of financing gives them partial ownership of those businesses and the possibility of sharing in the companies' profits as they grow and prosper.

Small Business Loan: A loan included in "loans to small businesses" as defined in the Consolidated Report of Condition and Income (Call Report). These loans have original amounts of \$1 million or less and are either secured by nonfarm nonresidential properties or are classified as commercial and industrial loans.

Small Farm Loan: A loan included in "loans to small farms" as defined in the instructions for preparation of the Consolidated Report of Condition and Income (Call Report). These loans have original amounts of \$500,000 or less and are either secured by farmland, including farm residential and other improvements, or are classified as loans to finance agricultural production and other loans to farmers.

Underserved Middle-Income Nonmetropolitan Geographies: A nonmetropolitan middle-income geography will be designated as underserved if it meets criteria for population size, density, and dispersion indicating the area's population is sufficiently small, thin, and distant from a population center that the tract is likely to have difficulty financing the fixed costs of meeting essential community needs.

Upper-Income: Individual income that is 120 percent or more of the area median income, or a median family income that is 120 percent or more in the case of a geography.

Urban Area: All territories, populations, and housing units in urbanized areas and in places of 2,500 or more persons outside urbanized areas. More specifically, "urban" consists of territory, persons, and housing units in places of 2,500 or more persons incorporated as cities, villages, boroughs (except in Alaska and New York), and towns (except in the New England states, New York, and Wisconsin).

"Urban" excludes the rural portions of "extended cities"; census designated place of 2,500 or more persons; and other territory, incorporated or unincorporated, including in urbanized areas.
