METRO Messenger

Letter from the President

Thank you for
Banking with a Neighbor,

Rodney Howard

Dear Neighbor:

Summertime in the Shoals, there's nothing quite like it! It's hard to believe that we are at the halfway point of 2020. With the uncertainty that filled the start of this year, we hope the remainder of 2020 brings opportunities to make great memories with friends, family, and First Metro Bank.

After several weeks of our lobbies being closed due to the pandemic, we have reopened the doors at all of our locations, with the exception of our Russellville branch. We are taking precautions to ensure the health and safety of all customers and employees. As always, if you aren't comfortable coming inside, you may choose to utilize our drive-thru lanes or First Metro Live. By touching the screen at any of our automated teller machines (ATMs) you will be connected to a live teller that can assist you in cashing checks, making withdrawals, deposits, loan and credit card payments, account transfers, and more! This serves as a great alternative to waiting in the drive-thru line or going inside the branch. It also eliminates physical person-to-person contact.

What better way to celebrate the reopening of our lobbies than with Sax in the City t-shirts! Stop by any First Metro Bank location to purchase your \$5 Sax in the City t-shirt. We have a very limited quantity this year, so don't wait to grab one of these popular summer staples while supplies last!

On Sale Now!

**SAX
IN THE
CITY
T-SHIRTS**

Available at all
First Metro Bank
locations in sizes adult small
thru 3XL, while supplies last!

FIRST FRIENDS UPDATE

The First Friends Committee is continuing to monitor updates regarding COVID-19. As this year's remaining trips and events approach, we will announce our decision before the final payment deadline. First Metro Bank's priority is your safety and we promise to make decisions with your well-being and health in mind.

We look forward to traveling with you again soon!

Creating a CYBER SECURE Home

Almost every home network starts with a wireless (or Wi-Fi) network. This is what enables your devices to connect to the Internet. Most home wireless networks are controlled by your Internet router or a separate, dedicated wireless access point. They both work by broadcasting wireless signals which allow the devices in your house to connect to the Internet.

Securing your wireless network is a key part of protecting your house. The following steps are recommended when building a cyber secure home:

- Change the default administrator password to your Internet router or wireless access point.
- Ensure that only devices you trust can connect to your wireless network. Doing so requires a password to connect to your home network and encrypts online activities once connected.
- Ensure the password used to connect to your wireless network is a strong password that is different from the administrator password.
